The main terms of the restricted share incentive plan I are set out below:

- (1) Equity incentive method: To furnish the restricted share incentive plan, three limited liability partnerships ("LLP") were established, namely Ningbo Renai Kangning Investment Management Partnership (Limited Partnership) ("Renai Kangning"), Ningbo Enci Kangning Investment Management Partnership (Limited Partnership) ("Enci Kangning") and Ningbo Xinshi Kangning Investment Management Partnership (Limited Partnership) ("Xinshi Kangning"). The general partner of Renai Kangning and Enci Kangning is Ms. Wang Biyu (the relative of the actual controlling persons and the employee of the Company); the general partner of Xinshi Kangning is Ms. Wang Hongyue. The qualified employees participating the restricted share plan contributed the capital at the grant price and become the limited partner of the LLP. After the establishment of the LLPs mentioned above, the original shareholder of the Company, Guan Weili and Wang Hongyue, transferred their share capital of RMB1,120,959 (4% of the equity of the Company) to the above three LLPs at consideration of RMB18.684 per share.
- (2) Vesting period: Since the date of becoming the partners of the LLP, those participating employees who will contribute the capital over RMB150,000 (inclusive) committed to serve the Company for 36 months while those contributed below RMB150,000 for 12 months from the date the Company was listed in a stock exchange. They would not resign during this period.

(b) The restricted share incentive plan II *(continued)*

The main terms of the restricted share incentive plan II are set out below:

(b) The restricted share incentive plan II (*continued*)

(3) The approach of revenue realisation

- (i) If the shares involved in the incentive plan fail to realise the listing during the validity period, the company undertakes to assist the owners in transferring the shares of the company corresponding to its share of equity held through the partnership to an independent third party of the company. If the transfer price is less than RMB32 per share at that time, the owner may require the actual controller of the company to pay for the difference between the actual transfer price and RMB32 per share.
- (ii) If the shares involved in this incentive plan are listed within the validity period, the owner may require the partnership to sell the shares of the company corresponding to its property share, in order to gradually realise the income of the property share on the premise of abiding by relevant laws and regulations, the requirements of relevant regulatory bodies and the relevant provisions of the articles of association.

(4) Repurchase clauses

Unlocked share of incentive stock is repurchased by the general partner of the partnership at the price of payment of contribution. The cash dividend received by the motivator during the lock-in period will be deducted from the repurchase price. The Company will repurchase and cancel the unregistered or unlocked incentive stock from the partnership at RMB10.47 per share 12 months after the expiration of incentive plan lock-in period.

The above transaction was considered as equity-settled share-based payment to employees. The fair value of the Group's shares granted to employees on grant date, 20 August 2018, as determined by a professional valuation firm, was RMB29,655,655. As at 30 June 2020, the related cost was RMB2,324,851 (30 June 2019: RMB2,688,937).

At the same time, the Company regarded the employee's subscription as inventory stock due to the above terms of repurchase and recognised an obligation of repurchase for the restricted shares at RMB23,311,144 (31 December 2019: RMB21,721,144).

13 Financial risk

The Group'

13 Financial risk (*continued*)

(1) Market risk (*continued*)

(b) *Interest rate risk*

The Group's interest rate risk arises from long-term interest bearing borrowings including long-term borrowings from banks. Financial liabilities issued at fixed rates expose the Group to fair value interest rate risk. The Group determines the relative proportions of its fixed rate and floating rate contracts depending on the prevailing market conditions. As at 30 June 2020, the Group's long-term interest bearing borrowings were mainly RMB-denominated with fixed rates, amounting to RMB87,000,000 (31 December 2019: RMB40,000,000). As at 30 June 2020, the Group had RMB54,000,000 of long-term borrowings measured at floating rate (Note 4(17)) (31 December 2019: RMB20,000,000).

The Group's finance department at the headquarter continuously monitors the interest rate position of the Group. Increases in interest rates will increase the cost of new interest bearing borrowings and the interest expenses with respect to the Group's outstanding floating rate borrowings, and therefore could have a material adverse effect on the Group's financial position. The Group's management makes adjustments timely with reference to the latest market conditions.

(2) Credit risk

Credit risk is managed on the grouping basis. Credit risk mainly arises from bank deposits, accounts receivable and other receivables.

The Group expects that there is no significant credit risk associated with bank deposits since they are deposited at state-owned banks and other medium or large size listed banks. Management expects that there will be low risk of significant losses from non-performance by these counterparties.

13 Financial risk (*continued*)

(2) Credit risk (*continued*)

The accounts receivable of the Group is mainly from sale of medicines to patients, the provision of medical services, and management service. According to the social insurance policies of each hospital's location, the medical expenses of the patients are usually borne by the patients themselves and the social insurance. The Company usually collects part of the advances when the patient goes through the hospitalisation procedures, and settle part of the patient's personal debt when he leaves the hospital. For the patients with outstanding payment after leaving the hospital, the Company will recover the debt by collecting on a regular basis. For the medical expense that borne by the social insurance, the Company will apply for reimbursement to the social insurance institutions after issuing invoices to patients. The reimbursement is usually collected 2 – 9 months after application for reimbursement. The Company believed that there was no material credit risk in this part of payment. There was part of medical expenses of the Group that was paid by government departments such as Civil Affairs and Disabled Persons' Federation where the hospitals are located. The Group would adopt different collection monitoring mechanisms for different payment methods.

Other receivables include the guarantee and deposit of the lease contract, employees deposit, prepayment for the employees social insurance, the loan to third party and receivables from the related parties. The Company believed that there was no material credit risk inherent in the Group's outstanding balance of other receivables after considering their credit status and the guarantees they provided.

(3) Liquidity risk

Cash flow forecasting is performed by each subsidiary of the Group. The Group's finance department at its headquarter monitors rolling forecasts of the Group's short-term and long-term liquidity requirements to ensure it has sufficient cash and cash equivalent to meet operational needs, while maintaining sufficient headroom on its undrawn committed borrowings facilities from major financial institutions to meet the short-term and long-term liquidity requirements.

14 Fair value estimates (*continued*)

(1) Assets measured at fair value on a recurring basis (*continued*)

The Group engaged Wenzhou Huaxin Assets Valuation Co., Ltd. to determine the fair value of the investment properties. The method of valuation adopted is the income method. The input values adopted were the rental, ultimate return rate/capitalisation rate and vacancy rate, with no significant change from 31 December 2019.

The financial department of the Group is responsible for determining the value of the financial assets and liabilities. Meanwhile, external independent valuers are entrusted to evaluate the fair value of the Group's investment properties. The financial department of the Group verified and accounted the assessment result mentioned above and prepared the disclosure information relating to the fair value based on the verified value assessment result.

(2) Assets and liabilities not measured at fair value but disclosed

The financial assets and liabilities that measured at amortised cost of the Group include receivables, payables, long-term payables and borrowings, etc.

The difference between the carrying amount of such financial assets and liabilities and their fair value is not material.

15 Capital management

The Group's capital management policies aim to safeguard the Group's ability to continue as a going concern in order to provide returns for shareholders and benefits for other stakeholders, and to maintain an optimal capital structure to reduce the cost of capital.

In order to maintain or adjust the capital structure, the Group may adjust the amount of dividends paid to shareholders, refund capital to shareholders, issue new shares or sell assets to reduce debts.

The Group's total capital is calculated as owners' equity as shown in the consolidated statement of financial position. The Group is not subject to external mandatory capital requirements, using gearing ratio to monitor capital.

As at 30 June 2020 and 31 December 2019, the Group's gearing ratio is as follows:
